

Effective chemical-free Air Sanitation systems

Ozonizer Applications

Uses of Ozonizer are endless. Here are some examples;

- Ozonizer units are ideal for the deodorization of air in rooms and improving air quality and destroying bacteria, viruses and mould.
- For people who suffer from allergies and environmental sensitivities, or those who just want to freshen up musty, smelly basements; "ground level" ozone can be a powerful ally.
- Ozonizer sanitizes your air in virtually anywhere at home or work ie. kitchen, bathroom, bedroom, wardrobes, pet area, store room, shoe cupboard, in car etc.

Please visit our website www.ozonizer.com.au for more information.

Models for commercial use are also available.
Custom systems can be developed.

Proudly associated with:

Ozonizer is effective in your kitchen

- ✓ Sanitises your work surfaces
- ✓ Clears the air of your cooking odours
- ✓ Deodorizes your cabinets and your pantry
- ✓ Deodorizes and sanitizes your fridge
- ✓ Kills pathogens on food
- ✓ Extends shelf life of your food

Now you & your family can breathe healthier, cleaner and purified air

Ozonizer represents the latest technology in ozone generating equipment for personal and commercial use for a fraction of the on-going cost of Air Fresheners or refills.

Rather than masking the odour with a fragrance, Ozonizer eradicates the airborne viruses and bacteria causing the smell.

Ozonizer deodorizes, sterilizes and disinfects your space chemical-free and environmentally friendly.

In your home, office, shop or even in your car, your air contains bacteria, food smell, body odour, house dust mites, pets' odour, fumes etc. *Now you and your family can enjoy fresher, cleaner and healthier air.*

Ozone is natural

- Ozone (O₃) is a natural component of the air we breathe each and every day.
- Ozone is created when oxygen (O₂) molecules are split into two separate atoms by ultraviolet radiation from the sun, lightning and electric arcs. The freed atoms recombine in three-atom groups to form cousins of oxygen or ozone (O₃).
- Ozone is one of the most powerful natural sanitizers and deodorizers known to science.
- Ozone (activated oxygen) doesn't merely mask odours and harmful substances, it seeks out and eliminates them at their molecular source for your benefit.
- Mountainous areas at higher altitudes, where high level of ozone is naturally occurring, are among places with the highest life expectancy figures in the world.

Two models to choose from to suit your needs

Ozonizer OA1

- Designed for all domestic or work applications
- Removal of nuisance odours, including tobacco smoke, food odours and body odours
- Pet odour and urine odour
- Destruction of micro-organisms such as bacteria, virus, fungus, mould, mildew, yeast, algae and amoebae including pathogenic germs
- Ozone generation Rate 0.8/1.4 PPM

- Powerful and variable output
- Adjustable output surface discharge unit
- 12Volt AC adapter included
- Aluminium housing

Ozonizer OA2C

- Designed for use inside vehicles and for small domestic or work applications
- Removal of nuisance odours, including tobacco smoke, food odours and body odours
- Pet odour and traffic fumes
- Destruction of micro-organisms such as bacteria, virus, fungus, mould, mildew, yeast, algae and amoebae including pathogenic germs
- Ozone generation Rate 0.1 PPM
- Environmental capacity 4m²
- Cigarette lighter adapter included
- 12Volt DC adapter included
- Aluminium housing

We would like to thank all our happy customers for their wonderful and encouraging comments. This is what some of our delighted customers have to say about their own experience with Ozonizer;

Liz & Lou, Quakers Hill

We are breathing and sleeping better than before, we wake up feeling more refreshed.

Elizabeth, Rouse Hill

I thought I would take a moment to express my delight with your amazing Ozonizer. It is so compact and portable I've already used it throughout my home - bedrooms and wardrobes, bathrooms, computer room, in fact anywhere that has needed a bit of freshen up. I've also used it to successfully de-odorize a car from usually hard to shift tobacco smoke.

Jill's Beauty Case, Mona Vale

The reason for this purchase was to purify the air within the salon, eliminate the dust and odours that come with acrylic nails, kill bacteria and prevent sickness throughout the workplace. I certainly have noticed the difference within the salon air, quality wise, and not one of my staff members have been attacked by the nasty winter viruses that walk in our door every day.

Swiss-Grand Hotel, Bondi Beach, Sydney

Garbage compactor located in the hoarding generates a smell in our hotel. Without this unit in place, I would receive numerous complaints.

Novotel, Darling Harbour, Sydney

I have been most impressed with the help of the unit in the battle of odours and smoke smell in our hotel's guest rooms and corridors. An efficient unit which when left in a room, clears the air in approximately 20 minutes.
